

1. Screening of cifA and cifB and their predicted protein domains

1.1. First screen

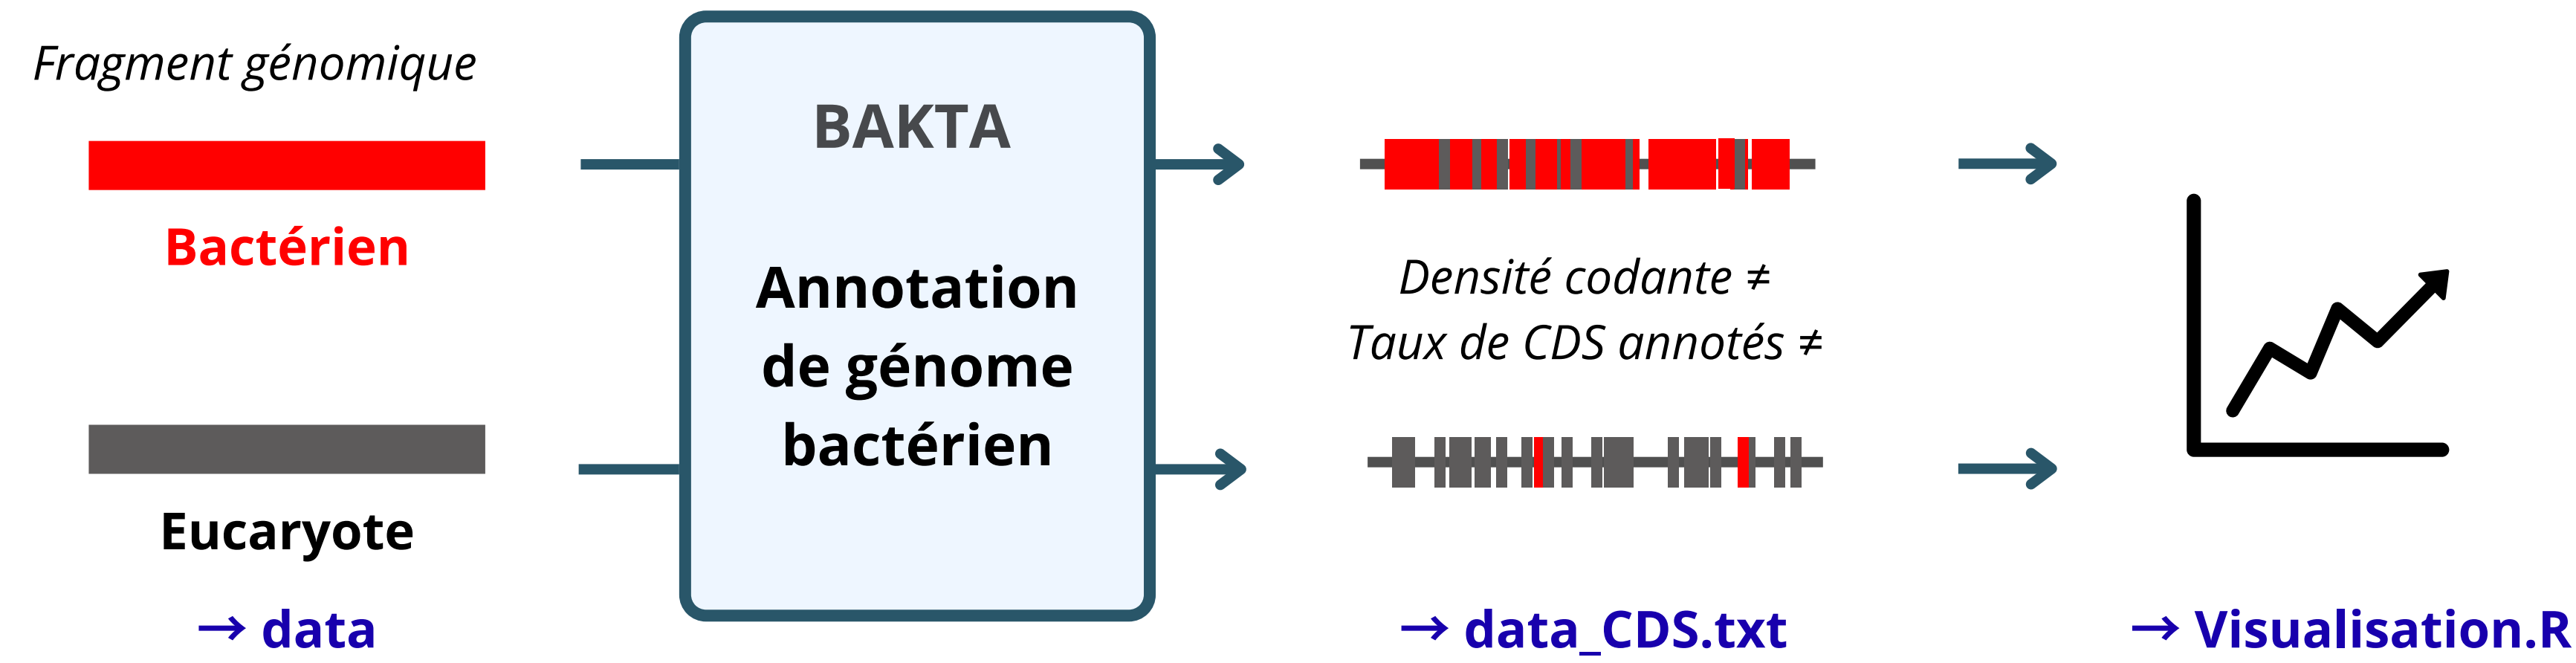

2. Phylogeny

2.1 Complete cif Phylogeny

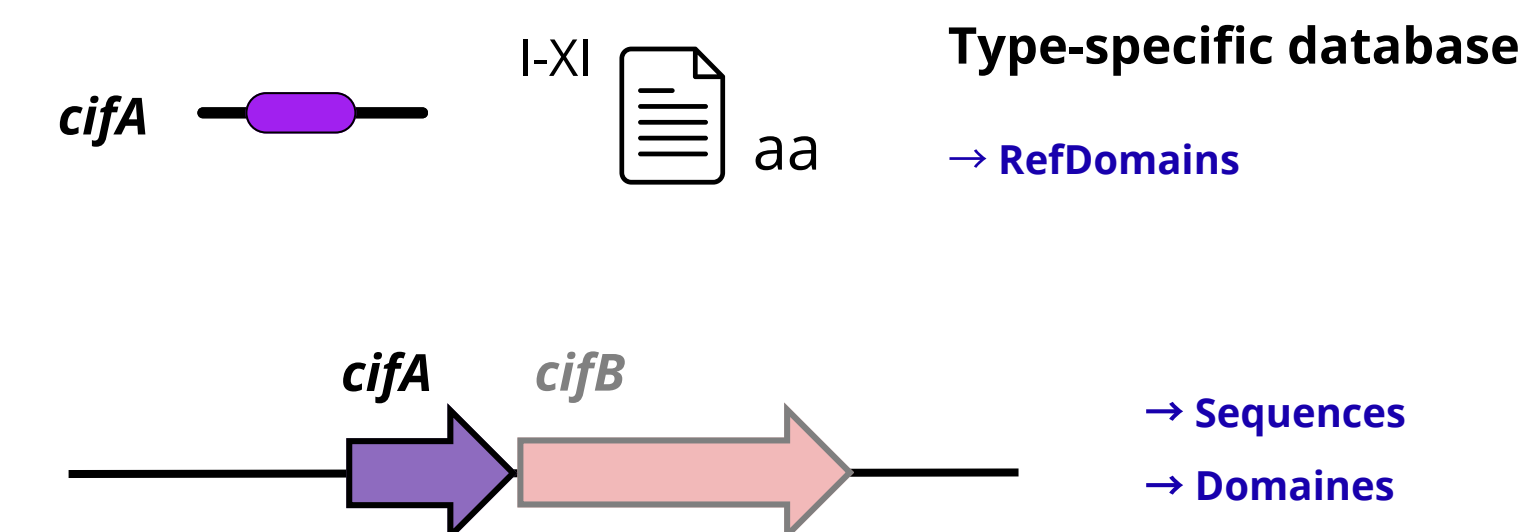

3. Genomic environment analysis of cif insertions

3.1 Preliminary validation of the Bakta-based genomic environment analysis

Tests exacts de Wilcoxon-Mann-Whitney, $p\text{-value} = 1,083 \times 10^{-5}$ → Data (Info) → Statistics.R

1.2. Second screen

2.2 Phylogeny of eukaryotic cifA-cifB pairs
